

TCT together with VMWare, EMC and Dell are making it easier for businesses to realise the benefits of virtualisation. This business-ready solution, based on years of experience, can help you on your virtualisation journey whether you are new to virtualisation or have already started.

Quick Specs

Dell PowerEdge R710 Rack Server

Dell's next generation Intel® Xeon® processor 5500 series 2U Rack Server with enhanced memory capacity. Great virtualisation and Database performance, designed for high energy efficiency.

- 2 x Quad Core 5520 Xeon Processors
- 24GB RAM
- 2 x 72GB SAS Hard Disks
- 6 Network Cards
- SCSI Card for Tape Drive
- 3 Years Support & Maintenance

Dell PowerEdge R610 Rack Server

The Dell PowerEdge R610 takes advantage of Dell's system commonality; When IT managers learn one system, they have learned the logic required to manage Dell's next generation servers. Dell's next generation 2-socket, 1RU rack server based on Intel® Xeon® Quad-Core 5500 series processors.

- 2 x Quad Core 5520 Xeon Processors
- 24GB RAM
- 2 x 72GB SAS Hard Disks
- 6 Network Cards
- 3 Years Support & Maintenance

Dell PowerConnect 5448 - 48 Port Gigabit Switch

The PowerConnect 5448 delivers 48 ports of wire-speed, Gigabit Ethernet with advanced security and enterprise management features to meet the needs of organisations of all sizes. 2 x 48 Port switches for redundancy, both communicating at Gigabit speed. Back by Dell's industry leading 3 years support & maintenance.

APC 3000 VA UPS

APC Smart-UPS On-Line, 2100 Watt 3000 VA & Network Management Card.

Dell LTO3 Backup Tape Drive

- External Tape Drive
- Tool-less design provides incredible ease of use
- 3 Years Support & Maintenance

VMWare VSphere v4 Advanced Acceleration Kit

VMware vSphere is the industry's first cloud operating system, transforming IT infrastructures into a private cloud—a collection of internal clouds federated on-demand to external clouds—delivering IT infrastructure as a service. Enable the next generation of flexible, reliable IT services with the efficiency and low cost of cloud computing—featuring control over service levels.

EMC NX4 Starter Bundle

The EMC Celerra NX4 brings the big benefits of consolidation to your business at an affordable price. With Celerra NX4 unified storage you can eliminate file servers and consolidate application storage with NAS, iSCSI, and Fibre Channel connectivity. This VMware-certified solution makes an ideal entry-level platform for virtualisation.

- Fibre & iSCSI connectivity
- Includes 12 x 300 Gb SAS Disks
- 1.5TB of High Speed Production Storage
- 800GB of secondary High Speed Storage (used for disk-to-disk backups, snapshots, archiving etc..)
- Expandable up to 60 disks (both SAS & SATA)

Consulting, Installation & Configuration

TCT will get you up and running in no time, with no upfront costs. You pay only \$462 per week for the entire package (leased over 5 years).

- Migration of your current physical environment to a new virtual environment
- Highlighted offer includes migration of up to 10 physical servers – a solution can be tailored for all size environments
- Includes full testing and project management
- Based on 125 hours of Professional Services
- Not all environments can be virtualised, call TCT for a free virtual assessment.

All pricing is Inc GST and is valid until 22/12/2009 or till stocks run out. Errors & omissions are excluded.
